

**As Kaya-Pen Plastik SAN. VE TİC. LTD. ŞTİ. ;**

Within the scope of Design, Production and Sales of PVC Door and Window Accessories, we are determined to protect the environment and to do our part in this regard, together with all our stakeholders, with the effective and successful work we will do in and around our establishment.

We are aware that leaving a healthy and habitable nature to future generations is possible through environmentalist studies.

In this direction, our primary goal is to continuously improve our environmental performance, with the awareness that sustainable growth is possible as long as we adhere to the principles of sustainable environment and energy. We are committed;

- To carry out our environmental management system in a way that will protect natural resources and take the life cycle into account,
- To manage the environmental aspects of all our activities in our establishment,
- To keep chemical risks, waste water and emissions under control by reducing the effects of our activities on the environment and preventing pollution,
- Preferring recycling as much as possible in waste disposal methods by minimizing the amount of waste,
- Researching, following and applying appropriate technologies and methods that will not harm the environment and save the use of resources,
- To work with the understanding of continuous development for the protection of the environment,
- To use raw materials and energy resources which are considers as a necessity of economic waste and protecting the environment efficiently,
- Making risk assessments and being prepared to reduce our negative impact on the environment in case of an accident or emergency,
- To minimize the formations that may occur after production and affect the environment by constantly controlling them,
- To consider environmental awareness as the first priority in the new investments we make or will make,
- To increase the environmental awareness and sensitivity to the environment by sharing our policy with our employees and stakeholders,
- To integrate environmental issues into our trainings in order to increase the awareness of our employees,
- To purchase energy-efficient products, services and technologies, supporting high-performance designs.
